

Molonglo Veterinary Clinic is a bright and sunny clinic. Our lovely custom-built clinic is in a new and rapidly growing area of Canberra with friendly and dedicated clients who love their pets. We have the usual toys and offer a range of services including high level soft tissue surgery, dermatology, ophthalmology, and advanced dentistry.

We have an experienced veterinary team and are interested in either a recent graduate or experienced veterinarian to join our practice. We have a recent graduate program and provide a great space for a vet to increase their confidence and learn to a high level. This includes a formalised mentoring program and regular rostered days off to allow upskilling and shadowing of other vets in the clinic.

[Please click here to see photos!](#) 

We love coming to work, enjoy each other's company, support each other and are looking forward to having a new vet join our team. We are flexible and would consider a full time or part-time vet. Our full-time vets have a rostered weekday off each week and a shared Saturday morning roster. Weeknight and weekend out of hours are covered by local emergency centres.

We pay above award, with wages being reflective of your skills and commensurate with experience.

For those vets out of the area, who have not yet experienced the joys of living in Canberra....think blue skies, mountain biking, bushwalking, galleries, bars and good coffee (and the occasional oddly-shaped hot-air balloon or two!). Our strong focus on a healthy work life balance ensures that you'll get plenty of chances to get out and explore!
